EPOS Cash register

CIBELITE TOUCH boosts your EFT-POS, turning it into a powerful multifunction POS.

No need to key-in twice the credit card amount : **CIBELITE TOUCH** processes the sale and the payment in one single move.

Several **CIBELITE** software versions, customized to the specific needs of various business, are available for download on your EFT-POS.

Various peripherals are available to improve comfort and efficiency.

Convenience Store

CIBELITE TOUCH provides state of the art functionalities. Besides standard ECR functions, its back-office allows management of any shop, from independent to larger chains, in every activity, through easy customization.

Supermarkets and large retail

To reduce cashing errors, **CIBELITE TOUCH** prints tickets after completion of payment. Thanks to its high speed thermal printer (18 lines/s), the **CIBELITE TOUCH** significantly reduces check-out time: a must in multi-lane stores.

To improve staff management, and secure cash collection, **CIBELITE TOUCH** implements the Mobile Cashier concept: one cashier, one dedicated smart card.

A standby ticket mode helps increasing customer throughput. **CIBELITE TOUCH** removable memory / Micro SD stores the cash registers parameters, hundreds of thousands articles and several years of electronic control strips.

Mobile commerce

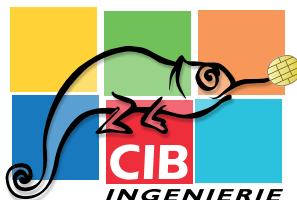

CIBELITE TOUCH fixed or mobile, fully autonomous follows you wherever your customers are: in the street, at customers' home, in railways, on boats and in planes... any place.

CIBELITE TOUCH is connected to your business computer (on line through GPRS, or through LAN when back from the field) to download and synchronize all sales, payments of any kind including cards, Inventory management, and delivery tour monitoring data.

Restoration

CIBELITE TOUCH is a perfect solution for RESTORANTS thanks to its dual mode: a countertop tactile keyboard or a handheld touchscreen.

- **TRADITIONAL RESTORATION:** **CIBELITE TOUCH** provides all the features from order at the table with kitchen transmission by Bluetooth, to the payment of the bill which can even be automatically split between the customers
- **FAST FOOD:** **CIBELITE TOUCH** allows ultrafast sales and receipt, vouchers processing, ...
- **CATERING:** **CIBELITE TOUCH** manages pass, contact and contactless cards and tokens, vending management, subvention, admission and prepaid cards reloading on CIB Automats.

CIBELITE PC : the central management tool

Several **CIBELITE TOUCH** can be interconnected on an LAN IP network and to the head office through the Web with IP or GPRS. **CIBELITE PC** is a back office solution which collects all the POS data, provides a global vision and allows automatic update of the local parameters (cash register parameters, price / keyboard changes, stock management, supplier management...).

FIDELE HIT monépass links

CIBELITE TOUCH can be interfaced seamlessly with CIB loyalty and e-purse softwares **FIDELE HIT** or **monépass**, thus allowing automatic loyalty points credit or redemption, as well as payment with the private electronic purse **monépass**.

Maintenance and security

All the data are stored on SD Card. Thanks to this software architecture, a defective **CIBELITE TOUCH** terminal can be replaced in less than a minute: Remove the SD Card from the device, insert it into the new one, everything restarts without change. You get optimum safety, even in case of power failure or battery failure. Software updates can be downloaded remotely or locally with a USB key.
